

## Chameleon RTK Guidance

**Perfectly combined:** The new **CRG-L2** represents the third generation of the Agra-GPS RTK receiver. It serves as a replacement for StarFire™ receivers, offering top precision with exceptionally easy operation.

Thanks to the **integrated Agra-GPS Agra-Bridge**, the **John Deere AutoTrac™ guidance system** can also be used on machines from other manufacturers – for example, on Fendt, CASE, or Claas equipment, and many other brands.

In addition, the **CRG-L2 is AGCO-compatible** and therefore also suitable for VarioGuide systems.

**CRG+:** The world's only receiver with lifetime free RTK signal – no subscription fees required.

### Mounting System:

- Locking mechanism for theft protection
- Convenient handle for secure installation
- **Fits all StarFire™ mounts**
- Tool-free installation
- No additional connectors required

### Full RTK Reception:

- Supports GPS, GLONASS, Galileo, and BeiDou
- L-Band **RTK via satellite**
- RTK bridging of up to 4 minutes
- **No additional fees** (from Agra-GPS)
- CRG+ provides unlimited, free RTK signal
- Multi-provider SIM – **automatically selects the best network**

### Contents:

- Integrated 4G RTK modem
- Built-in electronic terrain compensation
- Bluetooth and USB connectivity
- Integrated Agra-GPS Bridge

### Features & Operation:

- Compatible with John Deere and AGCO systems
- Compatible with Agra-GPS CRG Vision10
- Diagnostics via mobile app and ISOBUS interface
- Wireless updates
- Can be used as an implement receiver
- NMEA0183 & NMEA2000 output
